KC WATER NEWS

Protect Your Pipes!

Don't let a plumbing problem ruin your day. When fats, oils, and grease (FOG) are poured down the drain, they can build up in the pipe and cause sewer backups. The best way to manage FOG is to keep it out of your plumbing. **DO NOT** pour cooking oil, meat fats, or grease into the sink or toilet. **DO** place cooled FOG in a sealed container and discard with your trash.
